PERSONAL PROJECTS

DevWorld-Social Network for developers
(03/2019 - 05/2019) 🔗

- BackEnd is implemented using node.js,express.js and authentication is done by passport.js,Json web tokens
- FrontEnd is implemented using React.js, bootstrap,HTML,CSS and State management is done by redux

Full-Stack WebApp 🔗

- A simple CRUD based application which is made possible through Restful routing,node.js,express.js,Template done through EJS
- In this the user has login functionalities which is made possible through passport.js and also a comment section for each post

WORK EXPERIENCE

Fullstack Developer

ZEN3

08/2019 - Present

Vizag,India

Achievements/Tasks

- Worked on building FrontEnd for a Product using Vue.js, SSR(Nuxt.js) built from scratch, So had a big hand in the project structure, best practices, Countless UI Interfaces/Logics and architectural standards from the very beginning.
- Recognized as Outstanding Performer for the Quarter.
- Bootstrapped a V2 version of a product using React.js, Redux-saga using best scalable architecture, coding standards, Reusable components, Advanced Redux. This also has Node with microservices as backend which I am quite comfortable with and contributed a bit. Currently working on this product.
- Achieved Annual Excellence Award as Individual Extra Miler.
